Pune, Maharashtra, India

SKILLS

Frontend

- Angular
- RxJS
- Angular Material
- React.js
- TypeScript / JavaScript (ES6+)
- Redux
- HTML5 / CSS3 / SCSS

Backend

- Node.js
- NestJS
- Express.js
- REST & GraphQL APIs
- Microservices
- JWT Authentication
- OAuth 2.0
- RBAC

Cloud & DevOps

- AWS: EC2, S3, IAM, Lambda
- API Gateway, RDS, CloudWatch, ECS
- Docker
- Jenkins / GitLab CI/CD
- Git

Databases

- MongoDB
- MySQL
- PostgreSQL

Architecture & Design

- Distributed Systems
- Multi-Tenant Architecture
- System Design
- SaaS Applications

EDUCATION

Bachelor of Technology

Computer Engineering
Pune University, Pune
Graduated 01/2018

SUMMARY

Senior Full Stack Developer with 7+ years of experience owning the complete SDLC — from requirement analysis and client-facing solution design through to production deployment and support. Strong hands-on expertise in Angular and React.js, Node.js, NestJS, Express.js, AWS cloud services, and microservices architecture. Proven track record architecting scalable enterprise applications, leading technical design discussions, mentoring engineers, and delivering secure, high-performance solutions across healthcare, cybersecurity, and finance domains. Comfortable working directly with clients and stakeholders on impact analysis, effort estimation, and solution design in fast-paced Agile environments.

EXPERIENCE

Senior Software Engineer — Concentrix

January 2025 – May 29, 2026

- Designed scalable RESTful and GraphQL APIs and microservices using NestJS and Node.js supporting enterprise SaaS applications.
- Optimized frontend rendering, backend APIs, and database queries, achieving approximately 40% reduction in response time.
- Developed AI-powered enterprise applications integrating LLM-based summarization workflows, reusable React.js components, and scalable backend APIs.
- Mentored engineers and conducted code reviews to elevate code quality and foster team collaboration.

Senior Software Engineer — Intellitek.ai

June 2024 – November 2024

- Developed AI-driven applications with Angular, NestJS, and MongoDB to enhance user engagement.
- Built reusable modules and scalable backend APIs to support rapid feature development.
- Resolved production issues, leading to increased platform stability and reduced downtime.

Senior Software Developer — Indexnine Technologies

March 2019 – June 2024

- Led development of enterprise applications across healthcare, cybersecurity, and finance, enhancing cross-industry functionality.
- Architected enterprise SaaS applications using Angular, Node.js, TypeScript, and MongoDB, building responsive and reusable Angular components for complex enterprise workflows.
- Built scalable MEAN-stack applications supporting high user engagement and system reliability, with additional full-stack contributions using the MERN stack on select modules.
- Integrated third-party systems, chatbots, and mobile platforms, improving application interoperability.

KEY PROJECTS

IxHero Summarization — Concentrix

Developed an AI-powered enterprise platform for automated text and audio summarization with configurable workflows, scalable REST APIs, and high-performance user interfaces.
Tech Stack: React.js, Node.js, TypeScript, MongoDB, REST APIs, Agile

IxHero Reporting — Concentrix

Built an enterprise reporting and analytics platform featuring real-time dashboards, role-based reporting, audit tracking, advanced filtering, and data visualization.
Tech Stack: React.js, Node.js, MongoDB, TypeScript, REST APIs, Chart.js

Mercer Contract Application — Indexnine

Developed an enterprise contract lifecycle management platform with secure APIs, automated workflows, and scalable Angular frontend and NestJS backend architecture.
Tech Stack: Angular, NestJS, MongoDB, TypeScript, REST APIs

QiSpine — Indexnine

Developed a healthcare management platform for appointment scheduling, patient management, and clinic operations using Angular on the frontend with scalable backend services.

Tech Stack: Angular, Java, Spring Boot, PostgreSQL, REST APIs, TypeScript

AI-Driven Enterprise Platform — Intellitek.ai

Developed AI-driven enterprise applications with Angular on the frontend and NestJS/MongoDB on the backend to enhance user engagement, building reusable Angular components integrated with backend APIs.

Tech Stack: Angular, NestJS, MongoDB, TypeScript, REST APIs

LEADERSHIP & IMPACT

- Mentored junior engineers and established development best practices across teams.
- Led architecture discussions, technical design reviews, and production support initiatives.
- Delivered multiple enterprise products within aggressive timelines.
- Collaborated with cross-functional stakeholders to align technology decisions with business goals.
